Asset Allocation Pattern for the Scheme:	LIC NOMURA MF G-SEC LONG TERM EXCHANGE TRADED FUND.															
	<p>Under normal circumstances, the asset allocation pattern will be as follows:</p> <table border="1" data-bbox="548 380 1490 653"> <thead> <tr> <th data-bbox="548 380 954 443" rowspan="2">Instruments</th> <th colspan="2" data-bbox="954 380 1287 443">Indicative allocations (% of total assets)</th> <th data-bbox="1287 380 1490 443">Risk Profile</th> </tr> <tr> <th data-bbox="954 443 1133 495">Minimum</th> <th data-bbox="1133 443 1287 495">Maximum</th> <th data-bbox="1287 443 1490 495">High/Medium/Low</th> </tr> </thead> <tbody> <tr> <td data-bbox="548 495 954 569">Securities comprising of underlying benchmark Index.</td> <td data-bbox="954 495 1133 569">95</td> <td data-bbox="1133 495 1287 569">100</td> <td data-bbox="1287 495 1490 569">Low</td> </tr> <tr> <td data-bbox="548 569 954 653">Other Debt and Money market instruments*</td> <td data-bbox="954 569 1133 653">0</td> <td data-bbox="1133 569 1287 653">5</td> <td data-bbox="1287 569 1490 653">Low</td> </tr> </tbody> </table> <p>*Money Market Instruments include commercial papers, commercial bills, treasury bills, and Government securities having an unexpired maturity upto one year, call or notice money, certificate of deposit, usance bills, CBLOs and any other like instruments as specified by the Reserve Bank of India from time to time.</p> <p>The net assets of the scheme will be invested predominantly in securities constituting the GSEC10 NSE Index. This would be done by investing in all securities with the same weightage that they represent in the GSEC10 NSE Index.</p> <p>A small portion of the net assets will be invested in Debt and money market instruments permitted by SEBI / RBI including call money market or in alternative investment for the call money market as may be provided by the RBI, to meet the liquidity requirements of the scheme.</p> <p>The scheme does not intend to invest in securitized debt instruments and Foreign securities.</p> <p>The scheme would not invest in derivatives.</p> <p>The Scheme shall not engage in securities lending and borrowing.</p> <p>The scheme will not engage in short selling activities.</p> <p>Subject to the SEBI Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors. It must be clearly understood that the percentages stated are only indicative and not absolute. These proportions can vary substantially depending upon the perception of the Investment Manager; the intention being at all times to seek to protect the interests of the Unitholders. Such changes in the investment pattern will be for short term and for defensive considerations only.</p> <p>Since, LIC Nomura MF G-SEC Long Term ETF is a passively managed exchange traded open ended index scheme, therefore change in investment pattern is normally not foreseen. However, for short durations part of the corpus may be pending for deployment, in cases of extreme market conditions or special events.</p> <p>In the event of any deviations below the minimum limits or beyond the maximum limits as specified in the above table, the Fund Manager shall rebalance the portfolio within a period of 30 days.</p>	Instruments	Indicative allocations (% of total assets)		Risk Profile	Minimum	Maximum	High/Medium/Low	Securities comprising of underlying benchmark Index.	95	100	Low	Other Debt and Money market instruments*	0	5	Low
Instruments	Indicative allocations (% of total assets)		Risk Profile													
	Minimum	Maximum	High/Medium/Low													
Securities comprising of underlying benchmark Index.	95	100	Low													
Other Debt and Money market instruments*	0	5	Low													

<p>Investment Strategy</p>	<p>The Fund would invest not less than 95% of its corpus in securities comprising the underlying index and endeavor to track the benchmark index while minimizing the tracking error and therefore would follow a passive investment strategy. The scheme would aim to maintain least amount of cash & will also try & avoid investment in debt & money market securities. This would only be for the purpose of redemption requirements.</p> <p>Risk control measures</p> <p>Since investing requires disciplined risk management, the AMC would endeavor to incorporate adequate safeguards for controlling risks in the portfolio construction process. The Fund Manager will also review all counterparties prior to transacting, using internal guidelines. The fund manager shall follow the asset allocation pattern in SID under normal circumstances and residual cash may be invested in the collateralised borrowing & lending obligations (CBLO) / repo market, which seeks to ensure liquidity in the scheme under normal circumstances. There can however be no guarantee against liquidity issues within the scheme. The Fund Manager will also endeavour to actively manage the scheme duration based on the ensuing market conditions. Based on its interest outlook, the Fund Manager may take tactical and/or strategic interest rate calls to manage the investments of the scheme on a dynamic basis in order to exploit emerging opportunities in the market.</p> <p>The AMC may also implement certain internal control procedures / risk & exposure limits etc. for controlling risks which may be varied from time to time</p> <p>TRACKING ERROR</p> <p>While the objective of the Scheme is to closely track the index, the performance may not be commensurate with the performance of the underlying Index on any given day or over any given period. Such variations are commonly referred to as the tracking error. Tracking errors are inherent in any index fund and such errors may cause the scheme to generate returns which are not in line with the performance of the GSEC10 NSE Index or one or more securities covered by / included in the GSEC10 NSE Index and may arise from a variety of factors including but not limited to:</p> <ol style="list-style-type: none"> 1. Any delay experienced in the purchase or sale of shares due to illiquidity of the market, settlement and realisation of sale proceeds and / or the registration of any securities transferred and / or any delays in receiving cash dividends and resulting delays in reinvesting them. 2. The GSEC10 NSE Index reflects the prices of securities at close of business hours. However, the Fund may buy or sell the securities at different points of time during the trading session at the then prevailing prices which may not correspond to the closing prices on the NSE. 3. The constituent securities of the underlying index may be revised periodically by either excluding or including new securities. In such an event, the Fund will endeavour to reallocate its portfolio but the available investment/ disinvestment opportunities may not permit precise mirroring of the underlying index in a short period of time. 4. The charging of expenses to the scheme including investment management fees and custodian fees. 5. The potential for trades to fail, which may result the Schemes not having acquired shares at a price necessary to track the index. 6. The holding of a cash position and accrued income prior to distribution and accrued expenses. 7. Disinvestments to meet redemptions, recurring expenses, etc. <p>AMC would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible. Under normal circumstances, such tracking errors are not expected to exceed above 2% per annum. However, this may vary due to the reasons mentioned above or any other reasons that may arise and particularly when the markets are very volatile. However, there can be no assurance or guarantee that the Scheme will achieve any particular level of tracking error relative to performance of the Underlying Index.</p>
-----------------------------------	---

	<p>Portfolio Turnover The Scheme shall be a passively managed, Index Linked, open ended, exchange traded fund. It is therefore expected that there would be a number of subscriptions and redemptions on a daily basis through Authorised Participants and Large Investors. Generally, turnover will depend upon the extent of purchase and redemption of units and the need to rebalance the portfolio on account of change in the composition will be done within 30 days, if any, and corporate actions of securities included in Index.</p> <p>The scheme has no explicit constraints either to maintain or limit the portfolio turnover. It would be also difficult to have any reasonable accuracy in estimating the likely portfolio turnover. However, the fund manager intends to avoid any transactions in the portfolio unless there is any subscription, redemption or change in the underlying Index.</p>	
Risk Profile and Risk Management Strategy	Risk	Risk Management Strategy
	<p>Interest Rate Risk: As with all debt securities, changes in interest rates may affect the scheme's NAV as the prices of securities generally increase as interest rates decline and generally decrease as interest rates rise. Prices of long term securities generally fluctuate more in response to interest rate changes than do short-term securities. Indian Debt markets can be volatile leading to the possibility of price movements up or down in fixed income securities and thereby to possible movements in the NAV.</p>	<p>The fund will invest in a basket of debt and money market securities maturing on or before the maturity of the fund with a view to hold them till the maturity of the fund. While the interim NAV will fluctuate in response to changes in interest rates, the final NAV will be more stable. To that extent the interest rate risk will be mitigated at the maturity of the scheme.</p>
	<p>Liquidity Risk: This refers to the ease with which a security can be sold at or near to its valuation yield-to-maturity (YTM). The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is today characteristic of the Indian fixed income market</p>	<p>The scheme may invest in government securities, corporate bonds and money market instruments. While the liquidity risk for government securities, money market instruments and short maturity corporate bonds may be low, it may be high in case of medium to long maturity corporate bonds. Liquidity risk is today characteristic of the Indian fixed income market. The fund will however, endeavor to minimize liquidity risk by investing in securities having a liquid market.</p>
	<p>Credit Risk: Credit risk or default risk refers to the risk that an issuer of a fixed income security may default (i.e. will be unable to make timely principal and interest payments on the security). Because of this risk corporate debentures are sold at a higher yield above those offered on Government Securities which are sovereign obligations and free of credit risk. Normally, the value of a fixed income security will fluctuate depending upon the changes in the perceived level of credit risk as well as any actual event of the default. The greater the credit risk, the greater the yield required for someone to be compensated for the increased risk.</p>	<p>A traditional SWOT analysis will be used for identifying company specific risks. Management's past track record will also be studied. In order to assess financial risk a detailed assessment of the issuer's financial statements will be undertaken to review its ability to undergo stress on cash flows and asset quality. A detailed evaluation of accounting policies, off-balance sheet exposures, notes, auditors' comments and disclosure standards will also be made to assess the overall financial risk of the potential borrower. In case of securitized debt instruments, the fund will ensure that these instruments are sufficiently backed by assets.</p>

	<p>Reinvestment Risk: This risk refers to the interest rate levels at which cash flows received from the securities in the scheme are reinvested. The additional income from reinvestment is the 'interest on interest' component. The risk that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.</p>	<p>Reinvestment risks will be limited to the extent of coupons received on debt instruments, which will be very small portion of the portfolio value.</p>						
	<p>For detailed risk factors and risk management strategy, kindly refer to the Scheme Information Document.</p> <p>“The mutual fund or AMC and its empanelled brokers have not given and shall not give any indicative portfolio and indicative yield in any communication, in any manner whatsoever. Investors are advised not to rely on any communication regarding indicative yield/portfolio with regard to the scheme”.</p>
